Help for Severe Aortic Stenosis

Severe aortic stenosis is a narrowed aortic heart valve that doesn't open and close properly, reducing blood flow to the rest of the body.

Morton Plant Hospital is now enrolling eligible patients in the Medtronic Evolut R low-risk trial, which investigates the safety and effectiveness of a transcatheter aortic valve replacement (TAVR) system in patients with severe aortic stenosis who are at a low surgical mortality risk. TAVR is a minimally invasive alternative to open-heart surgery used to treat failing aortic heart valves in patients with severe aortic stenosis. Morton Plant Hospital was chosen as the first hospital in Tampa Bay to offer the TAVR procedure for patients with severe aortic stenosis who were at an intermediate or high surgical mortality risk. Our team has completed more than 700 TAVR procedures over the last five years.

To see if you or a loved one with severe aortic stenosis may be eligible for this trial, or for more information on the trial, call the Center for Advanced Valve and Structural Heart Care at Morton Plant Hospital at **(855) 44-VALVE (855-448-2583)** or visit **MortonPlantValveTrial.org**.

BEAUTIFICATION COMMITTEE

Judy Lee

Glenwood's Directors and residents, after the article in the October Gazette, have survived the wind and rain of Irma with some conditions of recovery that take time to correct. Those willing and able to help clean up the debris are much appreciated. It was very helpful to have the two large dumpsters on our grounds to collect limbs, Styrofoam, sheets of metal, and general debris for easy storage until removal was accomplished. Thank you to the Roslan's and the Association Treasury for providing them. Yards are adequately cleaned for mowing. Many carports, trim boards, and connecting aluminum remain missing until material is available to repair those areas. Because of the extensive damage in most of Florida, that material will not be available overnight. Yard caretakers, (i.e. Greg) have been too busy to do some of the house washing and lattice cleaning that is needed. Some insurance provision and repair businesses have not been scheduled. Because of the recovery time required to get it ready for the October walk through, the directors have decided to skip the October inspection and do it after New Years.

Although the additional three months is welcome, please, walk around your own unit to observe what needs to be done. These are the items on the checklist: the condition of your mailbox and post, pruning of plants, bushes, and trees, weeding of plant beds, safety of your electrical box as it attaches to your home, cleanliness of gutters, cleanliness of lattice work on foundations, maintenance of painted surfaces, and the replacement of Irma damaged roofs and trim boards. The board will work with residents on roof and trim repair since more time may be needed to accomplish our goal. Our goal remains: for Glenwood to be the most attractive and well kept park possible!

NEEDLE WORKERS

Barbara Strachan

The Glenwood needle workers have set ourselves to the task of making booties, hats and baby blankets for Kimberly House. A home for unwed mothers in Clearwater. They often bring an older child with them, and we are making a holiday item for them too. Please join us to help on Monday mornings at 10am in the Clubhouse. We have plenty of supplies and the patterns are knit or crocheted, so you can just bring yourself and your willingness to help.

November 23rd - Thanksgiving Dinner @ 2:00 p.m.

Those attending are asked to bring a side dish to share. There will be a sign-up sheet posted on the bulletin board for side dishes and desserts. Everyone is asked to bring their own table service.

A RECIPE TO SHARE

Jim Wildes

Jim's Awesome Shrimp Scampi

You Will Need:

1 Tbsp. Olive Oil
3 Cloves Minced Garlic
Red Pepper Flakes
1 Small Red Onion
1lb Medium Shrimp Peeled and Deveined
Salt and Pepper to Taste
Chopped Flat Leaf Parsley
Zest and Juice From a Lemon

How To Make:

Heat the olive oil in a large skillet or saute' pan over medium heat. Add the garlic and pepper flakes and cook until garlic is light brown about 30 seconds. Be careful here as garlic burns easily. Add the onion and continue cooking until translucent.

Season the shrimp with a dash of salt and add to pan. Cook, stirring constantly, until the shrimp are pink and lightly caramelized. Remove from heat, stir in the parsley and lemon juice. Season with salt and pepper. Serve just like it is on top of linguine.

One minute a day may lead to stronger bones

Keeping your bones in good shape is vital to your health as you grow older, especially for women. Research reported on the Medical News Today website suggests that women may be able to keep their bones strong by running just one minute a day.

Examining data from more than 2,500 women, researchers found that women who participated in high-intensity, weight-bearing physical activity like running 60-120 seconds a day had 4 percent better bone health than women who took part in less than a minute of physical activity. Women who performed more than two minutes of exercise had 6 percent better bone health.

The researchers cautioned, though, that they can't be sure whether high-intensity exercise leads to better bone health, or whether people with better bone health tend to exercise more.

New findings about the solar system intrigue scientists

Our solar system is full of interesting places—maybe not to live or even visit, but locations where life might flourish under the right conditions, or may once have been present. Two recent examples from the Science News website:

• **Life on Titan?** Scientists have discovered that the atmosphere of Saturn's moon Titan contains vinyl cyanide—a molecule that forms membrane-like structures and could support life. Computer simulations suggest the molecule is capable of forming flexible bubbles known as azotosomes, that could serve as an outer shell “protecting” genetic material from biochemical reactions in the moon's frigid methane seas. No one knows whether azotosomes actually exist on Titan, though. A probe would have to check out the seas to detect them.

• **Water on Venus?** With a surface temperature of 460 degrees, Venus is too hot to support water or life as we know it, but scientists speculate it might not always have been so inhospitable. The second planet's slow rotation—116 Earth days for a single Venusian day—might have led to a gradual cloud buildup in its atmosphere some 750 million years ago, bringing surface temperatures down to approximately 15 degrees Celsius—enough for the formation of a shallow ocean. What happened to the oceans, or whether they even existed, isn't clear. Scientists speculate they may have boiled away or been absorbed into the planet's interior.
