FROM THE EDITOR

Barb Mucci

If you would like an article considered for the March Gazette, please, bring the copy to the office by February 14th.

FROM THE OFFICE

The new Dial Directory is being compiled. If you do not have the latest one which would be 2017-2018, please, get one and confirm that all of your information is correct. That way 2018-2019 will be as up to date as possible.

GLENWOOD SOCIAL COMMITTEE

Jeanne Burket

Come join us for our first party of the year.

The Valentine Party will be held on Saturday, February 10th.

Cocktails from 5:00 pm to 6:00 pm. (BYOB) Dinner will be served at 6:00 pm. Great new entertainment by Blinkey & Fritz, a duo that sounds like four from 7:00 pm to 10:00 pm.

A beautiful basket valued at \$100.00 will be raffled off. There will also be a 50/50 raffle.

We will have a photo booth and pictures taken by professional photographer, Guy Hawkins, for a small fee.

Tickets will be \$9.00 for residents and \$10.00 for guests. Janet Green will be selling tickets at coffee, cards and bingo.

Ticket sales will be limited to 124.

MAD HATTERS LUNCHEON

The Mad Hatters Luncheon will be on Tuesday, February 6th 12:00 P.M. Our Hostess this month is Barb Mucci and we are going to Roosterfish on Missouri. If you need a ride or have any questions give Barb a call. Her number is 727-0209.

A special thanks goes to Jan Kearney our Hostess for January. We had a great time at O'Keefe's.

BINGO

Jeanne Burket

Bingo has been in progress since September. We have had a good turnout.

We would like to welcome back all our snowbirds and renters.

Join us on Thursday evenings for a night of fun, snacks, and possibly winning cash.

We start selling cards at 6:00 and end sales at 6:45 to give us time to add up the winnings for the night. Please, bring small bills as we are unable to break large bills and still be able to pay out bingos.

You can play all games and specials for only \$6.25. Daubers are available for \$1.00.

See you all at bingo on Thursdays. Bring your neighbors. The more players we get the bigger the payouts.

Can beet juice keep your brain young?

Beet juice may keep your brain young and fit, according to an article on the Runner's World website. The article cites a study reported in the Journal of Gerontology: Medical Sciences that found that a shot of beet juice an hour before exercise can have positive benefits to brains as they get older.

In the study, 26 sedentary men with an average age of 65 participated in six weeks of exercise. Some took daily shots of beet juice; others received a placebo. The participants walked on a treadmill three times a week for six weeks, building up to 50 minutes per session at increased effort. Comparing MRIs from before and after the trial, researchers found that the group that drank beet juice had significantly higher levels of "community consistency" within their brains.

The nitrate in beet juice, which converts to nitrite and then nitric oxide in the blood, has a strong positive affect on responsiveness in blood vessels, which in turn can increase the amount of oxygen reaching the brain and boost aspects of cognitive function.

Make sure drinking glasses are safe

Take a look in your kitchen cabinet at your drinking glasses. Do you have decorative glasses for water, wine, beer, or whatever you drink during the day? They may be hazardous to your health.

The Medline Plus website reports that researchers at the University of Plymouth in the United Kingdom analyzed more than 70 new and used drinking glasses and found that seven out of 10 tested positive for lead or cadmium—both toxic metals.

Lead was found in all colors and goldleaf designs. Cadmium was found in the highest concentrations in red enamel.

Lead in children's bodies can cause growth and developmental difficulties. Cadmium can cause cancer. Studies have also linked it to bone softening and kidney problems.

Keep deadly chemicals out of your body

The list of chemicals that can cause cancer is intimidating, and keeping them out of your food can seem like an impossible task. The Fox News website, though, offers these tips for keeping your food and water free of toxic chemicals:

- Buy a water filter. A good filter can remove many cancer-causing chemicals.
- Eat organic foods. You'll cut your exposure to pesticides and other chemicals and support an industry that doesn't pollute the environment.
- Bring your own mug. Foam cups from most coffee shops contain styrene, which gets pulled out when in contact with hot liquids. Take your own travel mug when you go out for coffee, tea, or other hot beverages.

Interstellar asteroid is a first

Asteroids can be found throughout our solar system, but astronomers have recently discovered one in interstellar space. The Science News website reports that the object, first believed to be a comet, is approaching the solar system at an unusually steep angle. Dubbed A/2017 U1, the asteroid is about 400 meters across and traveling 25.5 kilometers per second on a slingshot path past the sun. Astronomers plan to measure the colors in its reflected light to determine what it's made of and seek clues to its origins.

Red sky in Asia mystery solved

It's a centuries-old mystery: In the year 1770, skies over Asia turned a bright red for nine days. The cause of this unusual phenomenon has never been identified. Now, though, scientists believe they have an answer.

As reported on the Slate website, researchers recently uncovered a collection of 111 contemporaneous documents from that time, and learned that the red sky had lasted longer than previously thought (just two days) and was much larger as well.

Scientists' conclusion: The effect was created by an aurora caused by solar activity, sparking the longest geomagnetic storm in recorded history.

A similar aurora was observed on two nights in 1859 by a massive solar storm known as the "Carrington Flare." Analysis of records of sunspot activity in 1770 suggests that the Asian aurora was caused by sunspot twice as large as those that created the Carrington event.

If such an event happened today, it would likely have catastrophic effects, knocking out satellites crucial to communications and GPS instruments.

New mineral found on Martian surface

NASA has discovered evidence of an ironoxide mineral on the surface of Mars, the Science News website reports. The mineral, called hematite, was detected by spectral analysis of photos taken by the space agency's Curiosity rover in an area known as the Vera Rubin Ridge.

Curiosity zeroed in on a rock dubbed "Christmas Cove," and used its dust removal tool, a wire-bristled brush, to uncover an area some 2.5 inches across.

Observations made the rover's Mast Camera (Mastcam) and its Chemistry and Camera (ChemCam) confirmed the presence of the hematite, a mineral that may provide information about ancient environmental conditions on the red planet.
