"Thank you for doing a very professional job on my roof. I am not easily pleased with most contractors, ASC is the exception! Your crew was on time, sometimes even early. There are no leaks and it looks great. ASC was not the cheapest, which proves you get what you pay for."

Dunedin & Golden Crest Recycle Program:

As we start another winter season at Golden Crest, a reminder for all **Full Time and Snowbirds** returning to the Park:

- Items placed in the Blue Re-cycle Bin **should be cleaned prior to placing in the bin.** A sticker on top of the re-cycle bin details what items can be re-cycled. It has been noted on numerous occasions, re-cycle items are not being rinsed prior to placing in the Blue Bin, the City of Dunedin would appreciate this being completed.

- **Also remember on Monday's, the Blue Bins are placed at the curb for pick-up, place the Blue Bin at least 5 feet from the Green Waste (Garbage) Bin. This makes it easier for the trucks to pick up the Bins.**

It would be very much appreciated if the above procedures could be followed by everyone this winter. The City of Dunedin thanks you and Golden Crest Park, thanks you.

January 2018 Park Rummage and Bake Sale:

To donate to our once a year sale, please go through your coach and sort out gently used items you no longer require. Christmas items will no longer be accepted. These items may be donated at a local Goodwill Store.

Happy New Year” from your Board of Directors here at Golden Crest. Follow these tips to avoid accidents at home

Every year about 30,000 fatal accidents occur in people's homes, most of which were largely preventable. Making your home accident-proof isn't hard. To make sure your home is a safe home, review this safety checklist:

- Stairwells, stoops and steps. Tack down loose carpeting, augment dim lighting, and bolt handrails to walls with long screws.
- Exterior walkways and steps. If painted, repaint with a nonslip additive that prevents slipping or affix with nonslip strips.
- Electric garage door. Test periodically to make sure the safety stop mechanism is operational.
- Free-standing furniture. Secure bookshelves and storage units to walls with angled brackets, screws or bolts.
- Gas and water cutoff valves. Know how to close them. Use tags to identify each one, if necessary.
- Heating and water system. Have the vent stacks professionally checked annually to prevent toxic gases from entering the home.
- Water heater. Set temperature at or below 120 degrees Fahrenheit. Test highest temperature in running water with meat thermometer. Alternatively, install an anti-scald device on faucets and showerheads.
- Clothes dryer. Make sure it vents directly outside, not through a chimney flue, as lint is combustible and the fumes can be toxic.
- Radiators. Cover with a frame that is not touching the unit.
- Steam irons. Always unplug before filling with water.
- Toasters. Avoid toasting sugarcoated or filled pastries because the sugar can ooze, gumming up the inside and causing a fire.
- All appliances. Check to make sure they have UL listings, which guarantee the product meets safety standards. And make sure electrical appliances are not next to heating equipment.
- Light switches. Relocate any that are within reaching distance of a tub or shower.
- Electrical cords and plugs. Replace any worn piece, as they cause many household fires. Keep out of high traffic areas where they can trip children and adults. And never run under carpeting or rugs.
- Extension cords. Avoid using. If necessary, use cords with the same or greater wattage/ amperage than the appliance. Never run under carpeting or rugs.
- Electrical panel box. Ensure there's a main disconnect to cut off all power in case of a fire. Also, properly mark all circuit breakers.
- Fire extinguishers. Have at least two dry-chemical extinguishers, mount near kitchen and bedrooms, and check the pressure gauge at least twice a year.
- Smoke alarms. Test every six months.
- Medicines. Separate external and internal medications, and discard outdated ones.
- Kitchen knives. Store in blocks, not loose in drawers where blades are exposed.
- Stove tops. Cook on back burners when possible.
- Indoor locks. Make sure all locks can be opened from the outside in case of emergency.

More bad news about cigarettes

You probably know that smoking is bad for your health, but have you considered its impact on the environment? Among other things, it's a major cause of litter.

A report from the U.K.-based Greyhaze notes that more than 176,000,000 pounds of cigarette butts are discarded in the United States each year, amounting to 30 percent of all litter. More than 4.5 trillion cigarettes are littered around the world each year.

In addition, Greyhaze reports that more than 3.2 million cigarettes or cigarette butts were collected on beaches and inland waterways around the world in 2009, not including some 18,000 lighters, 74,000 cigar tips, and 36,000 tobacco pouches. The report notes that fish eat cigarette butts, mistaking them for worms and other food, and a single butt can kill a fish living in one liter of water.

Afraid of ghosts? Not everyone is

Would you buy a haunted house? Surprisingly, some homebuyers would be willing to live in their very own Amityville horror. Realtor.com's Haunted House Real Estate Survey of 1,000 people found that 30 percent are receptive to the thought of sharing living quarters with ghosts, 25 percent "might" be, but 42 percent would reject the idea outright.

Ghost-friendly buyers did list some caveats, though. Forty percent would expect a price cut on a haunted house, and others said extra space or a good neighborhood would increase their chances of accepting such a deal. Still, 28 percent of people in the survey said they've already lived in a haunted home, citing inexplicable noises, creepy feelings, or seeing objects move or disappear.

Listen to your internal clocks

The "clocks" in our bodies are important to maintaining good health—and messing with them can cause big problems. Three researchers recently won the Nobel Prize for their work studying how these clocks influence every cell in the human body. According to the NPR website, pulling an all-nighter for work or school, or jet lag caused by a transatlantic flight, can cause blood pressure to go up, disrupt hunger hormones, and increase blood sugar levels. You can overcome these problems over time, but a regular schedule that throws off your body clock can lead to such health problems as weight gain and Type 2 diabetes.

Late-night snacking can also disrupt your body clock. When darkness falls, your "master clock" advises other clocks not to eat. When you override that command, the pancreas starts releasing insulin to break down the food. This can reset the pancreas' clock and take it out of synch with other clocks in your body. The takeaway? Pay attention to the clocks inside your body for better health.

The courage to try

Life lessons can come from the most unlikely sources if we are open to receiving what they have to offer us. For Tricia Goyer, a wife, mother, and accomplished author, a lesson in bravery came from her twentysomething son Nathan.

When he announced his plans to write a book, Goyer encouraged him and even promised to edit it once the manuscript was completed. With 500 magazine articles bylines and more than 50 published books of nonfiction and fiction, Goyer knew her insight would be beneficial. She also knew that Nathan had a gift for creating and telling stories, which had been a favorite pastime since his childhood.

As Goyer edited Nathan's rough draft she realized that her son had a talent for writing and decided they should hire a professional editor to review the text. The editor also liked Nathan's work and offered the aspiring novelist some constructive feedback.

After the rewrites were finished, Goyer told her son to start weighing his options about next steps in the publishing process. He could go the traditional route and work with a publisher, or self-publish. Nathan told her he'd need time to think things over and then excused himself to run an errand. He returned a short time later and announced that he would self-publish his work as an e-book. The next day his novel *Bask* was for sale on Amazon.com. It has even received a few positive reviews.

For Goyer, taking those next steps in the process of publishing one of her many books has never been something she could act on with that kind of certainty or efficiency. She says she would first share copies with as many as 20 friends and consider their feedback. Next she might attend a workshop or conference to solicit even more feedback and advice before deciding which route to take.

Nathan has inspired Goyer to believe that “sometimes we just need to roll up our sleeves and do what we’ve been afraid to try.”
