## Coldest place in the world

---

**Y**ou may think it's cold where you live right now—if you're in the northern hemisphere, at least—but scientists have located the absolute coldest spot on Earth. No surprise—it's in Antarctica.

The National Geographic website reports that satellite data have identified an ice sheet in the middle of the southern continent with a temperature of minus 144 degrees Fahrenheit. This breaks the previous record for the chilliest place on the globe—minus 128 degrees, recorded in 1983 at the Russian Vostok Station close to the South Pole. At that low temperature, breathing itself is dangerous—more than a few breaths would make your lungs hemorrhage.

Chances are we won't find any colder places. Increases in greenhouse gases and water vapor in the air have scientists expecting a rise in temperatures across the Antarctic of three to four degrees in the coming years.

## Next time around

---

**A** student spent a semester abroad to learn about life in a different culture. Each day he left the home of his host family to walk several miles to the school for his classes. Along the way he'd pass a river.

Seated near the bank of the river was an old man. He was there every morning and also in the evening, no matter the time. He was also there on the weekends, sitting and staring off into the horizon, not interested in the comings and goings of the world around him.

After several weeks, the student's curiosity got the better of him. He approached the man and initiated a conversation. Eventually, the student asked the man why he sat by the river all day long.

The man explained that he believed in reincarnation and that his soul had been reborn many times. He said that life was filled with many lessons and that one might be reborn and faced with the same lessons many times before ascending into a different life the next time around.

He went on to say that some lifetimes were good, others were not. "This life is neither beautiful nor challenging, nor interesting nor exciting," the man said to the student. "I'm content to sit out this one."

## The high cost of health care surprises many

**H**ave you ever opened a medical bill and been stunned by how much you owe? You're not alone. The EurekaAlert website reports that 57 percent of Americans adults have been surprised by a medical bill because they thought the services were covered by their insurance. Twenty percent of them say the costs were because their physician wasn't in their network.

The costs have different origins. The most common are for physician services (53 percent), laboratory tests (51 percent), health care facility charges (43 percent), imaging (35 percent), and prescription drugs (29 percent).

*Life it is not just a series of calculations and a sum total of statistics; it's about experience, it's about participation, it is something more complex and more interesting than what is obvious.*

*—Daniel Libeskind*

## Alcohol a major contributor to deaths worldwide

**A** cold beer or a stiff drink may be relaxing, but according to a USA Today article, alcohol is associated with 2.8 million deaths a year, and was the seventh leading risk factor for premature death and disability in 2016.

As reported in a study written up in the medical journal The Lancet, researchers looked at almost 700 studies from around the world to investigate alcohol's health risks in 195 countries. Their findings included the fact that alcohol was associated with almost one in 10 deaths of people 15–49 years old, contributing to tuberculosis, car accidents, and self-injury. With people over 50, cancers were a leading cause of alcohol-related deaths—27 percent of deaths in women and 19 percent in men.

The study's lead author, Max Griswold of the Institute for Health Metrics and Evaluation at the University of Washington, advises: "If everyone cut their consumption in half, we could save a million lives globally."

**Michael Crofts**  
FL Licensed Independent  
Health Insurance Agent

Health insurance decisions can be confusing due to endless coverage changes and many policy types. Fortunately, there is someone who can work diligently to help and without cost to you – Michael Crofts, owner of Best Plan Choice.

Through his own healthcare experience Mr. Crofts learned the value of good health coverage and quality medical care. He dedicates his agency to helping people with Medicare and Medicaid needs. You can visit the office to learn about Medicare plan options or he will come to your home.

Every year your Medicare health plan coverage changes even if you do not change plans. Also, new products are introduced and many offer benefits beyond original Medicare and/or Medicaid plans. Baby Boomers had completely different insurance products during their working years. The indemnity and major medical policies are no longer the only choice and often do not meet the financial needs of consumers today.

Don't waste time trying to figure it out. Michael will sit with you and review all of the documents, and answer all of your questions. Most importantly, he will conduct a needs analysis to determine your individual needs – if you expect a hospitalization, use certain medicines, or want benefit like dental or vision – everything is taken into consideration.

Best Plan Choice is there to help you make the right choice and is available long after the policy is written. This means helping with doctor changes, plan questions, annual review of your benefits, and of course taking great care of any friend or family member you refer. At Best Plan Choice clients become friends, and friends become clients.

## Huge iceberg heading north

A massive iceberg is on the move. Scientists expected A-68, which split off from the Larsen Shelf in Antarctica in July 2017, to start crumbling shortly after the break. Instead, it remained mostly intact and anchored in a shallow seabed.

Now it's beginning to drift. Satellite images show it swinging counterclockwise to the north, due to a combination of ocean currents and weather conditions. Although it's lost some large chunks of ice, it's still almost as big as it was since the initial breakup—four times the size of the city of London, according to the UPI website, with a volume twice the size of Lake Erie and a weight of more than 1 trillion metric tons.

Scientists predict that A-68's drifting will dig gouges in the sediment of the seafloor beneath it. As it becomes increasingly exposed to warmer water, it will likely continue to spin and drift away from its birthplace near the South Pole.

## Cheese has a long history

Cheese has been popular for a lot longer than you may have thought. An analysis of ancient pottery from the Dalmatian Coast of Croatia has discovered traces of fermented dairy products like soft cheese and yogurt from some 7,200 years ago, according to the Science Daily website.

The discovery means that cheesemaking is 4,000 years older than previously known. Milk pottery from 7,700 years ago has been found in the area, indicating that our ancient ancestors had milk in their diets—at least their children up to about age 10. (DNA analysis shows that adults at that time were lactose intolerant.)

The development of cheese production changed the style and form of pottery as well. Among the artifacts found at the site were sieves, which are often used to strain milk when it becomes curds and whey. The sieves contained evidence that they had been used in secondary milk processing to make cheese or other dairy products.

expires 12/15/18

"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word – the house is doing all the talking! Thank you so much for my beautiful new house."

Carol Zapiecki, Clearwater, FL

**Vinyl Siding**  
**10% Off**

expires 12/15/18

**VINYL IS FINAL**

"Just a short note to express my appreciation for the work done on my mobile home. The crews that worked here...were gentlemen at all times, efficient, knowledgeable and prompt. You can be sure if I run into anybody who needs your type of work, I will surely recommend your company. It has been a very satisfying experience!"

George Lordstrom, Saint Petersburg, FL

## Lack of sleep and heart disease

The key to good heart health—and good health in general—may be a good night's sleep. According to a UPI article, a Swedish study has found that the risk of developing cardiovascular problems is double for men who sleep five hours or less a night.

Researchers tracked 798 men for 21 years, categorizing them by sleep pattern: five hours or less, seven to eight hours, and more than eight hours. The results indicated that the group sleeping five hours or less had twice the risk of a major cardiovascular event by 71, even after adjusting for such risk factors as obesity, diabetes, and smoking.

Yet one more reason to get your rest.

## What to do when someone isn't conscious

Someone is unconscious—not asleep, but out cold. What should you do? Call 911, of course, but while you're waiting, here are some tips from the Medical News Today website for helping out:

- Ask whether they're OK. If the person responds, ask some basic questions like their name, birthday, or the date. Wrong or confused answers could signify a brain injury.
- Check their airways. If the person doesn't respond, determine whether they're having difficulty breathing. If you see something lodged in the throat, try to remove it with a one-finger swipe. Otherwise don't go exploring—you may push an object deeper down the person's air passages.
- Don't put a pillow under the person's head. This can disrupt his or her breathing.
- Check for bleeding. If the unconscious person is losing blood, apply pressure to the wound or wrap a tourniquet above the area to slow blood loss until emergency personnel arrive.
- Don't make them sit up. If a spinal cord injury has occurred, this could be dangerous. If the person is breathing and there's no sign of a spine injury, roll him or her onto the side and adjust the legs so that the hips and knees are at right angles, and tilt the person's head back gently to keep the airway open.

## Monthly

---

**National Impaired Driving Prevention Month.** Help keep America's roadways safe this holiday season. Use a designated driver, rideshare, or a taxicab to transport you to and from the season's festivities. Drive sober and undistracted now and throughout the year.

**Safe Toys and Gifts Awareness Month.** Because your child's favorite toy can present a choking hazard or other serious injury, the folks at Prevent Blindness have created a list of guidelines that will help you make a safe toy purchase this holiday season. Visit their website at <https://www.preventblindness.org/safe-toy-checklist>.

**Universal Human Rights Month.** During this season of peace and goodwill, take time to recognize the equality, civil rights, and dignity of our fellow humans.

**Worldwide Food Service Safety Month.** December shines a spotlight on the food service industry, promoting proper sanitation, packaging, and food handling practices, as well as accurate labeling and storage and other considerations that help prevent contamination and food-borne illnesses. Be extra vigilant in choosing where you dine out or take out this month.

## Weekly

---

**Cookie Cutter Week, Dec. 1–7.** Roll out the gingerbread, shortbread, and sugar cookie dough, then use your favorite cutters to shape and bake a batch of tasty holiday cookies. Whatever you decide to bake, make sure you share.

**Hanukkah, Dec. 2–10.** This Jewish festival of lights is celebrated over eight days with special prayers, food, and the nightly lighting of the menorah.

**Older Driver Safety Awareness Week, Dec. 3–7.** The American Occupational Therapy Association uses this week to focus on the risks and challenges associated with driving for an aging population. Learn more at [www.aota.org/Conference-Events/Older-Driver-Safety-Awareness-Week.aspx](http://www.aota.org/Conference-Events/Older-Driver-Safety-Awareness-Week.aspx)

**Las Posadas, Dec. 16–24.** For more than 400 years, Catholics in Spanish-speaking countries have celebrated the Nativity through prayer, caroling, and musical re-enactments during the nine days preceding Christmas.

**Kwanzaa, Dec. 26–Jan. 1.** This weeklong African-American celebration of family, community, and culture helps to usher in the new year on a positive note.

## FLORIDA Under Home SOLUTIONS

where budgets and home solutions meet

### A F F O R D A B L E V A P O R B A R R I E R

Have You Looked **UNDER** **PROTECT**  
Your Home Lately? **YOUR HOME**

**Fix Small Problems Today**  
**Before They Cause Serious Damage!**

We will inspect and photograph any issues, showing you pictures of the underside of your home. Damaged & worn vapor barriers can create high energy costs and allow mold & mildew to grow and weaken your sub floor creating "Soft Spots". Keep Mold, Moisture & Animals out of your Home.

Repairs will be made quickly and include a  
**20 Year Transferable Warranty!**
