Get well:

- Bud Lowell (1-N) after being hospitalized for tests. His daughter's here until he's feeling better. We wish him a speedy recovery.
- Janice Thiede (12-0) sent to coach since we heard she was going to have surgery in Florida. Weeding can be stressful activity for tendons. Quick recovery after successful operation.

Sympathy:

Sadly we sent our memorial check and card to the Saville Family after the passing away of their mother, Lorrie, a long-time snow bird from Canada. Lorrie fought cancer for several years. Her husband, Jack, lost his battle with cancer three months ago. Both were very active during the winter season with helping with ROC and REC activities such as golf cart Christmas parade and volunteering on various committees. Their presence will be sadly missed. May they now be at peace together.

Please don't forget to send word of residents who are ill or grieving for a loved one. All it takes is a call or send an email. Thanks.

We have many friends in need of prayers for various serious medical conditions. Continue to pray for them all.

Send all news to Jane McHugh (14-H), 581-2664 or TJMAC39@aol.com. Weekly KK News is sent via email. Send note to the email address with KK NEWS in subject line. Your address will be added. Send email, IF you do not receiving this on Wednesdays let me know.

Multiply Your Monthly Mania!

As you probably already know; patronizing the advertisers in this newsletter also pays YOU with our Monthly Mania Cash Give-a-Way. **We pay out \$400 every month to residents** who submit tickets they have received from using the businesses in the newsletter. Winning is easy, just patronize any advertiser in the newsletter, then submit either the ticket or a paid receipt to us for your chance to win!

Veterans' Projects

Gil Himes, Ed Palka

Ed Palka (11-N) collects any MANUFACTURERS' COUPONS. These are usually in Sunday's St. Petersburg Times, Largo Leader and various magazines. All coupons are taken to Largo Elks Lodge #2159 for distribution to our troops stationed in Germany. They are honored six months AFTER their expiration date. Any coupons for baby products or something a new mother might need are sent to Ramstein Hospital, Landstuhl. Drop off the sheets, clipped or unclipped. There's a blue plastic bin in car port at 11-N. American and Canadian flags needing proper disposal may also be left. Ed will see proper procedure is followed. Unneeded hearing aids and eye glasses may also be donated. All will find a useful home.

Gil Himes (15-I) collects articles for our veterans at Bay Pines Hospital in St. Petersburg. Lap robes, hard candy, toiletries, gently used books, magazines, playing cards, dominos and other types of games are welcome. New packs of socks and t-shirts are also needed in sizes L, XL, and 2X. Going on vacation? Collect the hotel small bottles of products for use. Drop off items anytime at his coach. Don't forget our veterans during the summer.

Thank you all for your donations.

City life? Not for all young adults

The TV sitcom *Friends* depicted a group of young New Yorkers enjoying life in the big city—but in the end, at least two of them chose to move to a house in the suburbs. Young adults in real life appear to be making the same choice (without the laugh track). A survey of more than 1,500 people born since 1977, released by the National Association of Home Builders, found that few of them want to remain in the city for their entire lives.

Sixty-six percent indicated they'd like to live in the suburbs, and 24 percent have their hearts set on a rural residence. Only 10 percent want to live in the center of an urban area. They're mostly looking for space: Eighty-one percent said they want three or more bedrooms wherever they end up living.

Online videos bigger than TV these days

Video has taken over the Internet, especially among the younger generation. A survey of 13- to 24-year-olds by Defy Media found this evidence of the influence of YouTube and other video providers on youthful fans:

- Millennials watch an average of 11.3 hours of free online video a week, and 10.8 hours of subscription video—but only 8.3 hours of scheduled broadcast TV.
- Videos are more popular than online TV content. Seventy-six percent of young people in the survey said they find YouTube more entertaining than TV programs (more popular with 55 percent of participants).
- They're tolerant of advertising on the Internet. Fewer than half—41 percent—said online videos have too many advertisements, but 63 percent feel TV does.

Mathematics is the art of giving the same name to different things.

Get the full impact from these healthful foods

Certain foods have definite health benefits, but you have to eat them the right way to get their full impact. Here are some common foods you might be eating “wrong,” according to the CNN website:

- Flaxseed. Full of fiber and omega-3, these little seeds may improve your heart health—as long as you grind them up first. Sprinkling them whole over your cereal or yogurt will keep their nutrients locked inside.
- Broccoli. Eat this raw or steamed, not cooked, to receive the full dose of vitamin C, chlorophyll, and antioxidants this vegetable offers.
- Strawberries. Slicing this delicious fruit exposes its healthful nutrients to light and oxygen, which can dilute their effects. Eat them whole, or hold off cutting them until the last minute.
- Garlic. The enzyme allicin, found in garlic, may help ward off cancer, but its benefits are more pronounced when it’s exposed to air. Let garlic sit for about 10 minutes after chopping to release this enzyme fully.
- Tomatoes. Fresh tomatoes are tasty, but you’re better off cooking them. The antioxidants in them increase in potency when they’re heated to about 190 degrees Fahrenheit.

Stone tools point to early use by primitive humans

Humans have been using tools for longer than we’ve known. As reported by the journal *Nature*, a team of archeologists in Kenya have found stone tools dating back 3.3 million years, some 700,000 years older than the oldest tools previously discovered.

Before this find, the oldest known stone tools came from sites in Ethiopia and were believed to have been used some 2.6 million years ago. Still, evidence of earlier tool use suggested that humans may have been using stone for longer than that—fossils of animal bones, also in Ethiopia, show signs of cutting some 3.4 million years ago.

The Kenyan tools were dated with an analysis of the sedimentary layer where they were uncovered. Scientists speculate they may have been used to open nuts or fruits with hard surfaces. Weighing in at about 6.6 pounds, the tools are 10 times heavier than any stone tools discovered so far.

Keep relationships healthy over long distances

Ten years ago, some 2.9 percent of all marriages were long-distance relationships. Today that number has grown. Maintaining any kind of relationship takes work; when partners are separated, the effort grows. Keep your relationship steady and solid with these tips:

- Set ground rules. The secret to success in a long-distance relationship is managing expectations. Talk over how you'll handle the separation—who will be responsible for bills, child care, and other household issues. Do this ahead of time so nothing falls through the cracks. Set up a schedule for regular phone calls so you can plan conversations effectively.
- Communicate—but not too much. Regular contact is essential to the health of any marriage, so make a point of getting in touch as often as you need to. Just don't overdo it. If one partner feels crowded or badgered by insistent demands, he or she may back off, making the relationship even more complicated.
- Vary your channels. Don't rely on the telephone alone. Use e-mails and texts to send quick messages without interrupting the other person at work or at an awkward moment. Variety helps strengthen any relationship, so look for different ways to connect.
- Plan positive visits. You'll want to get together with your partner as often as you can. Don't put too much pressure on yourselves to make each visit spectacular, though. Give yourselves time to relax so no one feels personally responsible for the visit's success. You both need some downtime to get used to being with each other again.
- Be flexible. Travel plans can change at a moment's notice. An emergency may delay or interrupt a phone call. Although you're disappointed, do your best to respond positively and patiently when other demands disrupt your planned activities. Getting into a fight over every minor crisis won't keep your relationship strong.

Physical fitness is not only one of the most important keys to a healthy body, it is the basis of dynamic and creative intellectual activity.

Keeping up with current events

How much do you know about current events? The Pew Research Center News IQ survey examined the knowledge of more than 3,000 U.S. residents in an interactive quiz that asked them to identify a series of photographs, charts, and maps. Here's how the participants measured up when asked to ...

- Identify a photo of Martin Luther King Jr.: 91 Percent
- Identify the country led by Kim Jong-il from a photo (North Korea): 82 percent
- Identify the location of Guantanamo on a map (Cuba): 78 percent
- Name the country the U.S. recently re-established relations with (Cuba): 76 percent
- Identify the proposed route of the Keystone Pipeline on a map: 73 percent
- Identify Malala from a photo (2014 Nobel Prize winner): 93 percent
- Identify Pope Francis's home country on a map (Argentina): 52 percent
- Give the correct number of female Supreme Court justices (three): 33 percent

Have you taken your fish oil today?

Natural dietary supplements are big business in the U.S. As part of the National Health Interview Survey, researchers looked at the use of natural supplements other than vitamins and minerals. Comparing figures from 2002, 2007, and 2012, the trends they found include:

- Fish oil. This was the top product used by adults in 2012, as well as among children (though in 2007, Echinacea was the most popular supplement among children).
- Melatonin. This sleep aid came in second for children in 2012, increasing significantly from 2007.
- Glucosamine/chondroitin. Use of this decreased between 2007 and 2012, along with a drop in the use of Echinacea and garlic.
- Ginseng. This showed another large decline from 2002 to 2007, along with the use of Gingko.
- Green tea and milk thistle. Use of these held steady (though low) between 2007 and 2012.

Monkey see, monkey do, monkey—cook?

Humans and chimpanzees share many genetic traits, and scientists have recently discovered one that may surprise fans of the Cooking Channel and the Food Network: a basic understanding of how to cook food.

Chimps have long exhibited a preference for cooked food over raw. A team from Harvard and Yale decided to see if they could be taught to “cook” food on their own. Observations have shown that chimps are willing to give up something like a slice of raw sweet potato if they expect to receive a cooked one in a short time. To test their hypothesis, the scientists devised a process to mimic cooking (since they didn’t want the apes to use actual heat): two plastic bowls that fit closely together, with a bit of pre-cooked food hidden in the lower bowl.

The scientists would put a piece of raw potato into the bowl, then switch it after a few minutes for the cooked one. After a while, the chimpanzees began doing the same thing—placing a piece of food into the bowl, waiting, then looking for the tastier result.

The researchers believe this shows a basic cognitive ability to understand the cooking process, as well as the patience to carry out—traits that may have driven crucial changes in human evolution.

Follow the right FORM for effective innovation

Innovation may seem spontaneous, but it generally succeeds because the groundwork has been methodically laid ahead of time. To spark creative thinking in your organization, follow consultant Charles Day’s acronym FORM:

F: Focus. Start by deciding what’s important to your team and organization. What were you created to achieve? Identify the key goals of your vision so you have something to work toward.

O: Organization. Decide on a structure for developing and implementing ideas. Who is responsible for specific tasks? What jobs should be shared? How will you make decisions?

R: Resources. Gather what you’ll need to implement your plans. This includes not just tools and materials, but people. Identify the types of talents you’ll need to bring an idea to reality.

M: Measurement. Look to the end as you begin. Determine how you’ll know whether you’ve succeeded or failed. Goals should be specific and clear to everyone, and they must be relevant to your organization’s vision.

September Is...

Baby Safety Month. Drowning, falls, chemicals, and other hazards can endanger the life and health of any small child. During September, take a good look around your house and eliminate any threats to babies' safety that might be hiding in plain sight.

Library Card Sign-Up Month. A time to remind parents and children that a library card is the most important school supply of all. If you don't already have a library card, get one in September; if you do, visit your local library and use it.

National Bourbon Heritage Month. A celebration of bourbon as America's "Native Spirit." The U.S. Senate declared September National Bourbon Heritage Month in 2007, calling on those who enjoy bourbon to do so responsibly and in moderation.

National Campus Safety Awareness Month. College campuses are not immune to destructive behaviors and violence due to high-risk drinking, drug abuse, sexual assault, fire safety, and more. As your kids head to college this month, talk to them about safety and investigate the resources their school offers.

Week to Week

National Suicide Prevention Week, Sept. 8-14. An annual campaign to inform and engage health professionals and the general public about suicide prevention and warning signs of suicide. Awareness events are held throughout the week around World Suicide Prevention Day, Sept. 10.

National Truck Driver Appreciation Week, Sept. 13-19. Sponsored by the American Trucking Associations, a federation of state associations, affiliated conferences, and individual members committed to developing and advocating policies that promote highway safety, security, environmental sustainability, and profitability.

Pollution Prevention Week, Sept. 21-27. The best way to protect the earth and its people is to stop creating pollution in the first place. Less waste and pollution means fewer hazards to public health and the environment. Pollution Prevention Week highlights the efforts of the EPA, its state partners, industry, and the public in preventing pollution right from the start.

Banned Books Week, Sept. 27-Oct. 3. Sponsored by the American Library Association to promote the importance of ensuring the availability of books to all who wish to read them.

Probe your personality to achieve lasting results

People who succeed at their jobs, in their careers, and at the game of life are generally aware of their strengths and honest about their weaknesses. If you want to achieve greatness, focus on these key elements:

- Identity. Who are you? Don't think about your job, but your values and deepest beliefs about people and life.
- Accomplishments. What have you already done in your career? Examining your past successes can help you move forward to new victories.
- Reputation. How do others see you? Get some honest feedback. If you're not happy with the answer, improve your attitude so people see a more positive you.

The Best Antidote

A young wife lived with her husband's mother. Although she loved her husband, she found her mother-in-law impossible to deal with. In her desperation, she decided to poison the woman and get her out of her life.

She found a doctor willing to help her. As he gave her the poison, the doctor said, "Just so that no one suspects you, treat your mother-in-law as nicely as you can. Give her a little bit of this poison every day, and in a month your problems will be over."

The wife followed his instructions, treating her mother-in-law with special kindness as she slipped the poison into her food every day. Toward the end of the month, she went back to the doctor.

"Something strange happened," she said. "Ever since I've been nice to her, she's been nicer to me. Now she seems more like a friend than a mother-in-law. Can you give me an antidote for the poison before she dies?"

The doctor smiled. "I gave you ordinary vitamins. The only poison was in your own mind."

The world is shaped by two things—stories told and the memories they leave behind.
