The strange case of The Strange Case

Most of us are familiar with the story of Dr. Jekyll and Mr. Hyde, in which a mild-mannered scientist transforms into a hideous, beastlike villain. The story behind the story is less dramatic, but also fascinating.

Robert Louis Stevenson (1850-1894) had long been interested in the relationship between good and evil. One night his wife woke him in the middle of a nightmare, and he told her he'd been dreaming about a man turning into a monster. That became the genesis of the tale.

Stevenson wrote his story at a feverish pace, finishing a draft in about three days. As was his custom, he gave it to his wife for comments. She returned the pages saying that the tale was really an allegory, not a straightforward story. He took her advice to heart—so much so that he burned his first draft so he could revise it without relying on his previous version at all.

The Strange Case of Dr. Jekyll and Mr. Hyde was an immediate success, spawning plays and movies devoted to the concept of two diametrically opposed personalities in the body of a single person.

The least deserving may be in the most need

A Zen master invited pupils for a gathering devoted to study and meditation for many weeks. One day a student was caught stealing from the others, and the matter was brought before the master. They insisted the thief be expelled, but the master declined and the student remained.

Several days later the thief was caught again, but once again the master refused to take action. Now the rest of the students were angry, and they drew up a petition demanding the dishonest one be thrown out. They presented their petition and waited for the response.

The master replied calmly, “You are all wise brothers who know what is right and what is not right. You may go anywhere to study if you wish. But this poor brother does not know right from wrong. Who will teach him if I do not?”

There is no doubt fiction makes a better job of the truth.
—Doris Lessing

"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word – the house is doing all the talking! Thank you so much for my beautiful new house."

Check your assumptions

Dr. Herbert L. Tanenbaum shares many stories about his years as a cardiologist in his book *Out of the Doctor's Bag* (Beckham). One of them highlights the need to question assumptions carefully:

A doctor teaching medical students posed a diagnostic problem to his class. A patient reported that his urine was green — what could cause such an unusual symptom? The students were stumped, since nothing seemed to account for the strange coloration.

Finally the doctor revealed the answer: The patient was actually color blind, and couldn't distinguish between green and red. He was thus passing blood, but mistook it for the wrong color.

Believe in yourself

Motivational speaker Brian Tracy likes to tell a story about a young man who graduated from a small-town high school with high grades. He applied to the state university, took the required aptitude test, and was accepted.

But during his first semester, the young man failed every course. His counselor finally brought him in for a meeting. “What seems to be the problem?”

“I can't do the work,” the young man said. “My IQ is only 99. That's what it said in my admission letter.”

The counselor pulled up the young man's file. “No, this score of 99 puts you in the 99th percentile. That means that you scored equal to or higher than 99 percent of all the students in the country who took this test. You're one of the brightest students on this campus.”

The young man stayed in school and graduated in the top 10 of his class.

Every great love starts with a great story.
